

Supply Chain Disclosure Palm Oil

Snapshot: July 2020

Published: August 2021

Total volumes sourced in 2020: 453 000 tons

Notes:

As with any traceability efforts, this is a snapshot that reflects our supply chain mapping efforts over the last years, last updated in July 2020, which is a mix of self-declaration and paper based verification, and should **not be taken as fully exhaustive nor fully accurate as supply chain flows evolve on a daily basis**. To the best of our knowledge, the information contained in this list is accurate and reliable as of the date of publication; however, we do not assume any liability whatsoever for the accuracy and completeness of this information. Therefore no rights can be derived from this list.

Based on the traceability information declared by our suppliers in 2020, Nestlé achieved 96% traceability to mill. The list below reflects the traceability for 96% of the volumes we sourced.

The mills association with Tier 1 suppliers does not indicate ownership of the mills by that Tier 1 supplier. The mill owner is indicated by the "Mill Company Name". The Tier 1 supplier relationship to the mill is through direct or indirect sourcing, except in the cases where the Mill Company Name is the same as the Supplier name.

One palm oil mill indicated with an asterix (*) was declared by our suppliers in 2020. It has however been suspended from Nestlé's supply chain due to grievances brought to our attention alleging non-compliance against the Nestlé Responsible Sourcing Standard (RSS). We are working with our suppliers to ensure that this mill (at a group level) is not be part of our supply unless appropriate remediation plans have been agreed and are being implemented. We aim to share accurate and credible traceability data.

Any stakeholder who may have any reliable data that is inconsistent with our own is invited to share it with us, so we can analyze it and make any necessary correction to our supply chain disclosure.
